Product information TC601

Product description and application:

Our latest handheld computer, the TC601, can withstand a drop of 1.8m. This is an exceptionally strong performance for this type of device.

A modern Qualcomm® Snapdragon™ 660 2.2GHz Octa Core CPU enables the Android OS to be updated for years to come, allowing the device to meet high IT security requirements.

The TC601 has a powerful, removable 4000mAh battery, and is designed to resist rough usage. The 6-inch IPS Full-HD LCM display features Gorilla® Glass 6, and the device has IP67 certification.

On request, we offer extensive additional equipment such as a hand strap, touch pen, belt pouch and much more.

Detailed technical information available upon request.
